INDIA INTERNATIONAL FARMING EXPO

India International Farming Expo (IIFE) 2027 is one of India's premier business and knowledge platforms dedicated to the future of agriculture and allied industries. Bringing together manufacturers, technology providers, government organizations, research institutions, startups, exporters, distributors, nursery owners, FPOs, and progressive farmers, IIFE creates a dynamic ecosystem for collaboration and growth.

The Expo Showcases Five Sectors:

- **Horticulture**
- **Agri Machinery**
- **Agro Chemical**
- **Bio Energy**
- **LIVESTOCK** (Dairy, Poultry & Aquaculture)

Why Exhibit?

- **Connect with buyers and distributors**
- **Launch innovative products**
- **Generate B2B opportunities**
- **Meet nursery owners and exporters**
- **Build strategic partnerships**
- **Expand into India's growing agricultural market.**

Ways IIFE can help you Achieve your Marketing Objectives

India International Farming Expo 2027 will provide a dynamic three-day platform for business, networking, and knowledge sharing through the following activities:

1. **Exhibition:** A world-class exhibition with 250+ exhibitors showcasing innovative products, technologies, and solutions in a business-friendly environment for buyers from across India.
2. **Conference:** An industry-focused conference bringing together policymakers, experts, researchers, and business leaders to discuss trends, innovations, and opportunities in agriculture and horticulture.
3. **Excellence Awards:** Recognizing and honouring outstanding organizations, innovative products, and industry leaders for their exceptional contributions to the Horticulture, Agri Machinery, Agro Chemicals, Tea & Coffee, Bio Energy, and Livestock sectors. The awards ceremony will celebrate excellence and innovation while providing industry-wide recognition to the winners.
4. **VIP Buyer Program:** A curated buyer program connecting exhibitors with key buyers through targeted invitations and exclusive networking opportunities.
5. **B2B Meetings:** Pre-scheduled one-to-one meetings between selected exhibitors and registered buyers to facilitate meaningful business discussions.
6. **Social Media Promotion:** A digital campaign reaching 50,000+ industry professionals, with additional promotional opportunities for exhibitors.
7. **Product Launch Support:** Launch new products with enhanced visibility through the inauguration ceremony, conference sessions, VIP visits, media coverage, and other event activities.
8. **Post-Event Promotion:** A comprehensive post-show report highlighting event achievements, key announcements, business outcomes, and exhibitor participation to ensure continued visibility even after the event.

Why Visit IIFE

Identify New Technologies

Understand Best Practice

Develop New Suppliers

Source new Materials

Technology is evolving at a rapid pace which is leading to an explosion in new product offerings. IIFE is your platform to see first-hand, compare, review and procure products, services and technologies that can help take your business to the next level in terms of efficiency and profitability. This comes along with the perks of seeing what your peers are doing.

HORTI CULTURE

Horticulture is one of India's fastest-growing agricultural sectors, encompassing fruits, vegetables, flowers, spices, plantation crops and nursery products. Rising demand for high-quality produce, ornamental plants, protected cultivation, tissue culture and sustainable landscaping continues to drive rapid industry growth.

The sector is advancing through precision farming, greenhouse technologies, mechanization, smart irrigation, drones, digital agriculture and climate-smart practices. These innovations create significant opportunities for growers, input suppliers, equipment manufacturers, seed companies, agri-tech innovators and solution providers across the horticulture value chain.

AGRI MACHINERY

Agricultural mechanization has become a key driver of modern farming, enabling higher productivity, improved efficiency, and sustainable agricultural practices. From tractors and harvesters to seed drills, planters, sprayers, drones, and precision farming equipment, agri machinery helps farmers reduce labor costs, optimize resources, and increase crop yields. India is one of the largest manufacturers of agricultural machinery, producing over 900,000 tractors annually, making it the world's largest tractor market by volume. With increasing farm mechanization and government support, the Indian agri machinery market is expected to exceed USD 25 billion by 2030.

AGRO CHEMICALS

The agro chemicals industry plays a vital role in modern agriculture by enhancing crop productivity, protecting crops from pests and diseases, and ensuring global food security. Agro chemicals—including fertilizers, pesticides, herbicides, fungicides, and bio-stimulants—help farmers improve yields while minimizing crop losses. India is the fourth-largest producer of agro chemicals in the world and one of the leading exporters of crop protection products. The Indian agro chemicals market is valued at over USD 11 billion and is expected to grow steadily, driven by increasing food demand, technological advancements, and sustainable farming practices.

BIO ENERGY

Bio Energy is among the fastest-growing renewable energy sectors, converting agricultural residues, biomass, organic waste, and industrial by-products into clean and sustainable energy. Solutions such as biomass pellets, Bio-CNG, biogas, bioethanol, biodiesel, and waste-to-energy are driving decarbonization and energy security worldwide. **India** is emerging as a global bioenergy leader through the **National Bioenergy Programme, SATAT**, and the **Ethanol Blending Programme**. The Indian bioenergy market is projected to exceed **USD 35 billion by 2030**, while the global market continues to expand with rising demand for renewable energy.

LIVESTOCK (Dairy, Poultry & Aquaculture)

Livestock Farming is one of the fastest-growing agricultural sectors, supporting food security, nutrition, rural livelihoods, and economic growth. Covering **dairy, poultry, aquaculture, animal health, feed, processing, and farm automation**, the industry is adopting advanced technologies to improve productivity and sustainability. **India is the world's largest milk producer, second-largest egg producer**, and a leading producer of fish and meat. Backed by **government support** and rising investments, the Indian livestock sector is witnessing strong growth, while the **global market** continues expanding with increasing demand for sustainable, technology-driven farming solutions.
